Yeti Airline crash location

- Yeti Airlines flight 691, after taking off from Kathmandu's Tribhuvan International Airport on January 15, crashed on the Seti River gorge between the old airport and the new airport in the resort city of Pokhara.
- The aircraft had been flying from the capital of Kathmandu to Pokhara, the country's second-most populous city, the country's state media The Rising Nepal reported. Pokhara is located some 129 Kilometers (80 miles) west of Kathmandu.
- The plane was last in contact with Pokhara airport at about 10:50 a.m. local time, about 18 minutes after takeoff. It then went down in the nearby Seti River Gorge. First responders from the Nepal Army and various police departments have been deployed to the crash site and are carrying out a

- “During the time of the crash, the prevailing visibility was 6 km and the sky was almost clear with only a few clouds,” points out the preliminary report.
- At 10:56:12, the pilots extended the flaps to the 15 degrees position and pushed the landing gear lever to the down position. Captain Khatiwada then disengaged the autopilot system at an altitude of 721 feet above the ground.
